Research Appointments

2007-pres **University of CA- SD, Dept of Bioengineering**, La Jolla, CA. *Principal Investigators: Van Cheng MD.*

- Hypertension-Induced Venous Insufficiency in a rat model
- Amelioration of matrix metalloproteinases by Selected Anti-Inflammatory Interventions

1999-2002 **University of CA- SD/ VAMC, Cardiology Division**, La Jolla CA. *Principal Investigator: Alan Maisel, MD.*

- Pilot studies in patients admitted with decompensated congestive heart failure.
- Study of changes in B-type natriuretic peptide (BNP) levels during treatment
- Showed that BNP level are strong predictors for mortality and early readmission.
- Showed that BNP levels can accurately reflect acute changes in pulmonary capillary wedge pressure during treatment of CHF.

1997-1998 **Brigham and Women's Hospital, Cardiology Division**, Boston, MA. *Principal Investigator: Thomas Michel, MD, Ph.D.*

- Harvard senior honors thesis research to understand the regulation of nitric oxide synthase.
- Tissue culture experiments of CD8-eNOS expression in COS-7 cells.

1994-1997 **Harvard, Dept. of Molecular and Cellular Biology**, Cambridge, MA.
Principal Investigator: John Chant, Ph.D.

- Conducted experiments on the budding yeast, *Saccharomyces cerevisiae*, to identify gene products involved in microtubule capture during cell division.

1993 **VA Medical Center/UCSD, Nephrology Division**, La Jolla, CA.
Principal Investigators: Scott Thomson, MD and Roland Blantz, MD

- Conducted research on the immunosuppressive drug, Cyclosporine A, in transplant patients.
- Work culminated in the award, the 1993 National Kidney Foundation Young Science Scholar Award and the \$40,000 scholarship mentioned above.
